My Portfolio

Education and Qualifications

Bachelor of Information Technology, (Games Technology) with honors **October 2022 - March 2026**
University Technical Malaysia Melaka (UTeM)

- Expected Graduation: November 2026
- Cumulative CGPA: 3.71/4.0
- Relevant Course Work: Multiplatform Game, Game Engine Architecture, Interactive 3D Animation, AI For Games, Programming Fundamentals for games, Web Game Development, Game Design and Development

Course in Physical Science **March 2020 – November 2022**
Perak Matriculation College

- Expected Graduation: November 2022
- Cumulative CGPA: 3.43/4.0
- Relevant Course Work : Science Computer, Physic, Mathematics, Chemistry

Academic Projects

Lead Developer | Rhythm Boxing with Sony Mocopi Integration, UTeM **March 2025**

- Developed a 3D rhythm-based boxing game in Unreal Engine 5 to showcase the capabilities of the Sony Mocopi motion capture device.
- Integrated 6-point motion tracking via LiveLink, achieving real-time player movement with <50ms latency, tested across 30 players.
- Programmed a dynamic, customizable track-selection system featuring unlimited .wav song to be upload.
- Engineered 5 gameplay effects (audio spectrums, chaos physics, screen shake) to enhance visual immersion for 34 playtesters while maintaining optimized performance.

Experience

STEM Education Intern | Micro Concept Tech (MCT) **November 2025 – April 2026**

- Designed and structured comprehensive STEM curricula for primary and secondary students, leveraging VEXcode VR, Kodular, and mBlock to accelerate block-coding literacy and computational reasoning.
- Facilitated hands-on robotics training, guiding students through the physical assembly, wiring, and programming of educational hardware kits to bridge the gap between software logic and mechanical execution.
- Developed custom teaching modules and interactive robotics simulators, providing students with accessible virtual environments to safely test and debug their code before physical deployment.
- Authored and delivered an accessible 10-slide educational presentation on the "7 Principles of AI Ethics," simplifying complex concepts like algorithmic bias, privacy, and accountability for younger audience

STEM Educator & Technical Lead | Petronas Solar Workshop (SMK Tun Abdul Razak) **April 2026 – June 2026**

- Led Research & Development (R&D) for the "Smart Solar LED Bottle Lamp," designing and iterating 5 prototype enclosures in Autodesk Fusion 360 to achieve a highly polished final product.
- Managed small-scale manufacturing using a 3D printer and with PLA,PETG filament, producing 34 complete solar enclosures and 1,000 custom education coins for school-wide use.
- Designed and executed a comprehensive STEM curriculum integrating electronics, 3D design, and rapid prototyping.
- Conducted hands-on electronics training, guiding students in wiring solar panels, breadboards, and related electrical components.

- Instructed students in orthographic drawing and mobile-based 3D modeling using Tinkercad to design custom enclosures for their solar projects.
- Select and mentored a top-performing team of 4 students and their teacher, preparing their final prototype and presentation for the SAMNOVA national competition.

Professional Development Trainee | K-Youth Development Program **July 2026 – August 2026**

- Completed comprehensive training in corporate fundamentals and professional communication, bridging the gap between technical engineering skills and workplace integration.
- Learned generative AI multi-tools to streamline the creation of corporate multimedia, including prompt engineering for video, image, and audio synthesis.
- Designed professional business assets and marketing materials, utilizing Canva to produce high-quality flyers and digital content for corporate applications.
- Utilized Microsoft Excel for data organization, analysis, and business reporting, enhancing productivity and administrative efficiency.

Achievement

- Gold Medal, UTeM Representative, Digital Innovation Creativepreneur 3.0 **September 2025**
- 2nd Place, Game Jam under Multimedia University **May 2025**
- 2nd Place, Student Game Jam under XSolla Curine Academy **April 2025**
- 1st Place, Workshop II Innovation Competition Poster Design under UTeM **April 2025**
- 3rd Place, App Development Competition under Dewan Bahasa Pustaka **November 2024**
- 4th Place, Game Jam under Dewan Bahasa Pustaka **October 2023**
- Silver Medal, Tabletop Innovation under PPD Bagan Datuk **April 2022**

Extra-Curricular Activities

Leadership & Event Coordination

Technical Coordinator (TPIC) | Tech Day Photobooth Studio **December 2024**

- Managed the technical setup and operational logistics for the Tech Day Photobooth Studio, facilitating an engaging experience for over 40 attendees.

Event Coordinator / Committee Member (AJK) | Interactive Media Club (IMC) **October 2024 – May 2025**

- Facilitated logistics, planning, and execution for 20 club initiatives, including the Annual General Meeting, Route Tour, and the Visual Effect Workshop.
- Co-organized an industry visit to Larian Studios, providing peers with valuable exposure to professional AAA game development pipelines and networking opportunities.

Teaching & STEM Education

Lead Organizer & Instructor | Unity Game Development Workshop, UTeM **November 2024**

- Organized and led a comprehensive game development workshop for 20 university students, teaching core mechanics, scripting, and engine navigation in Unity.

Volunteer Instructor | Mahfaa Charity **September 2024**

- Taught introductory game development concepts to 15 autistic children, fostering digital literacy and creativity in an accessible, highly engaging environment.

Game Development & Quality Assurance

Development Assistant & QA Tester | GeoPlay **December 2023 & August 2024**

- Assisted in the development phases of *Pejuang Kiru*, contributing to project milestones.
- Conducted rigorous Quality Assurance (QA) testing, identifying, documenting, and troubleshooting bugs to improve the overall gameplay experience.

Quality Assurance Tester | Univrse **May 2024**

- Performed comprehensive QA testing for *Empayar: The Melaka Chronicle*, ensuring software stability and reporting in-game issues prior to final deployment.

Technical Skills

- Programming: C++, c#, Java, HTML
- Game Engines: Unreal Engine, Unity
- Creative Tools : Blender, Adobe Illustrator, After Effect, Audition, Canva, Audacity, Fusion 360
